

# *HVVA's Mapping History*

**Note:** Since this project was started in 2008, nearly a thousand historic structures have been plotted within the counties that make up the Hudson Valley Region with the use of Google Maps. Much of the content has been recovered that was lost when Google revamped their mapping app. We continue to add new places as we discover them as well as making improvements, such as larger images, are ongoing & we always welcome receiving updated information about the sites already on the map or any omissions. Please forward updates to kaw569@yahoo.com
